Description

Connectors of P type are intended for use in DC and AC (frequency up to 3 MHz) electrical circuits with voltage up to 850 V (as peak)

The connectors are produced in four versions: unsealed Plugs, unsealed Receptacles, hermetically sealed Receptacles and hermetically feed through bulkhead

The connectors are manufactured:

- Receptacles, P-A & P-M types, with backshell (straight shielding, straight non-shielding, elbow shielding, elbow non-shielding) or without backshells
- unsealed Plugs with backshell (straight shielding, straight non-shielding, elbow shielding, elbow non-shielding)

The connectors have threaded coupling

Contacts:

- unsealed Plugs, unsealed Receptacles, hermetically sealed Receptacles: \varnothing 1,5 mm; \varnothing 2,5 mm; \varnothing 3,5 mm, \varnothing 5,5 mm; \varnothing 9,0
- hermetically feed through bulkhead: \varnothing 1,5 mm; \varnothing 2,5 mm; \varnothing 3,5 mm

Contact plating:

- P – silver;
- P-M, P-C – nickel

The connectors are manufactured in all climatic conditions in accordance with the technical conditions GEO.364.107TU, GEO.364.108TU
